

How to review the cards in Materialteknik

All 405 cards are in rotation, and the service opens to students once every card has been reviewed. **Your part is the polymers, topics 12–14.**

108

cards in your topics 12–14

16flagged by Kuggfri's
source check**about 2 h**roughly a minute per card,
more for flagged ones**Instant**every decision is saved, so
split the work as you like

Getting started

1

Open the link

Open the link from Alvin in your browser. It lets you in for a week while the service is closed to students.

2

Create an account

The sign-in page is in Swedish: choose **Skapa konto** (Create account) with the address Alvin registered, then confirm via email.

3

Switch to English

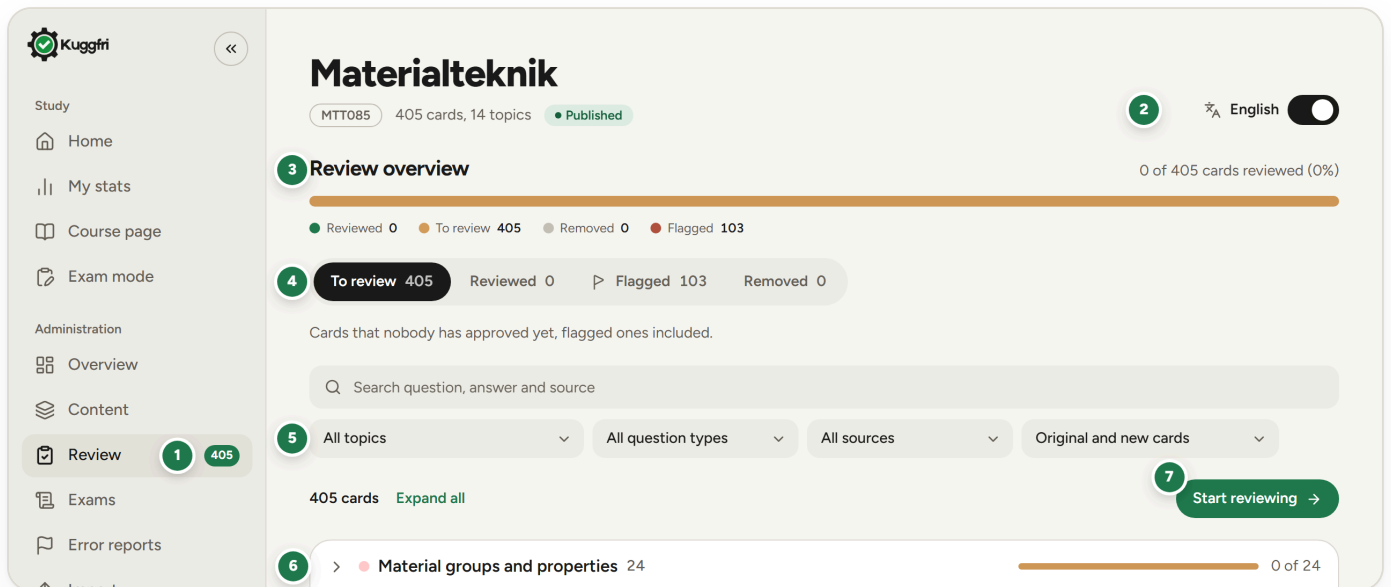

Turn on **English** at the top right of the review page. It applies to you only; students see Swedish.

4

Open Review

In the sidebar, under Administration, choose **Review**. Pick a topic under **Topic** and press **Start reviewing**.

The review page

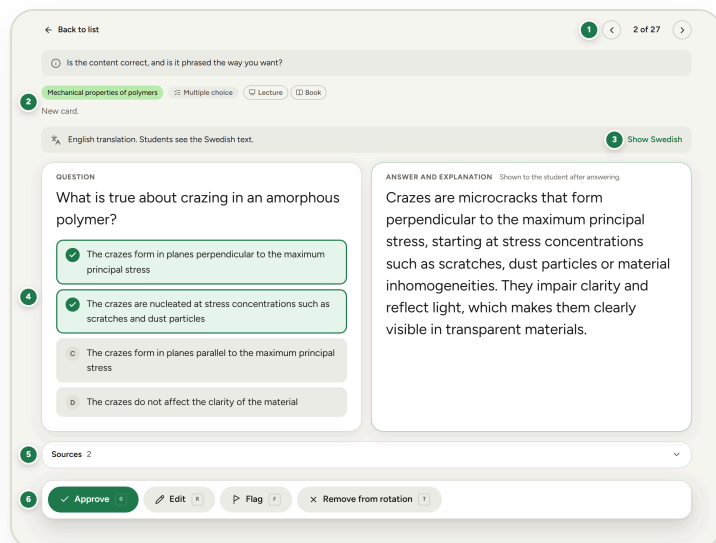

The screenshot shows the Kuggfri review interface for 'Materialteknik'. The sidebar on the left contains navigation links: Study, Home, My stats, Course page, Exam mode, Administration (Overview, Content, Review, Exams, Error reports), and Import. The 'Review' link is highlighted with a green circle and the number 1. The main content area shows the course title 'Materialteknik' with a sub-header 'MTT085 405 cards, 14 topics' and a 'Published' status. A 'Review overview' section shows a progress bar for '0 of 405 cards reviewed (0%)' and a legend for 'Reviewed 0', 'To review 405', 'Removed 0', and 'Flagged 103'. Below this are tabs for 'To review 405', 'Reviewed 0', 'Flagged 103', and 'Removed 0'. A search box is present, followed by filter dropdowns for 'All topics', 'All question types', 'All sources', and 'Original and new cards'. A 'Start reviewing' button is at the bottom right. A progress bar at the bottom shows 'Material groups and properties 24' out of 24. Numbered callouts 2-7 point to the English toggle, the review overview, the tabs, the filters, the search box, the progress bar, and the 'Start reviewing' button respectively.

- 1 Review** in the sidebar, with the number of cards left.
- 2 English** switches the whole service and every card to English, for you only.
- 3 Review overview:** how much of the course has been reviewed, and how many cards are flagged.
- 4 The tabs** To review, Reviewed, Flagged and Removed. A flagged card appears under both To review and Flagged.
- 5 Filters:** choose your topic under Topic. The search box searches question, answer and source.
- 6 The topics** expand with a click. The bar shows how far the review has come in each topic.
- 7 Start reviewing** opens the first card in the filtered list.

One card at a time

The card is shown the way the student sees it, with the correct answer marked. The question to ask is the one at the top: is the content correct, and is it phrased the way you want?

Is the content correct, and is it phrased the way you want?

2 Mechanical properties of polymers Multiple choice Lecture Book

3 New card

4 English translation. Students see the Swedish text. Show Swedish

QUESTION

What is true about crazing in an amorphous polymer?

ANSWER AND EXPLANATION Shown to the student after answering

Crazes are microcracks that form perpendicular to the maximum principal stress, starting at stress concentrations such as scratches, dust particles or material inhomogeneities. They impair clarity and reflect light, which makes them clearly visible in transparent materials.

4

The crazes form in planes perpendicular to the maximum principal stress

The crazes are nucleated at stress concentrations such as scratches and dust particles

The crazes form in planes parallel to the maximum principal stress

The crazes do not affect the clarity of the material

5 Sources 2

6 Approve Edit Flag Remove from rotation

- 1 **Move** between cards with the arrows, or with **J** and **K**. **Back to list** takes you back.
- 2 **Topic, question type and sources**. The line below says whether the card is new, an original card from earlier cohorts or a corrected original.
- 3 **Show Swedish** shows the text the students actually see. A warning appears here if the Swedish card has changed since it was translated.
- 4 **Question and answer**, as the student sees them. Answer options are marked correct or wrong.
- 5 **Sources** expands to show exactly which lecture, page or exercise the card is based on.
- 6 **The action bar** with your decisions. The letter on each button is its keyboard shortcut.

Four decisions

✓ **Approve** **G**

The card is correct and phrased the way you want. It moves to Reviewed and stays in rotation.

Flag **F**

Something needs to change. Write what in English and press Enter. We fix the Swedish card and its translation, and it comes back to you for approval.

Remove from rotation **T**

The card does not belong in the course. Students no longer see it, and it moves to Removed, where it can be put back.

Edit **R**

Opens the card's Swedish text for editing. For wording changes, flagging with an English note is usually easier: we make the change in both languages.

Keyboard shortcuts

The letters come from the Swedish button names (G for Godkänn), so they are the same in both languages.

G	Approve	J	→	Next
F	Flag	K	←	Previous
T	Remove from rotation	Esc		Back to list
R	Edit	Ctrl	Z	Undo

Good to know

- Every decision is saved immediately and takes you to the next card. You can stop at any time and continue later.
- Undo with **Ctrl** **Z**, or with Undo in the message after each decision.
- Changed your mind? Open the card under Reviewed or Removed and press **Mark as unreviewed** (**O**).
- If an approved card is changed, it returns to To review.

Flagged cards from Kuggfri's source check

Before the review, every card was checked against the course's own material: lectures, lab instructions, old exams and the course literature. Where the sources disagree, or where we have corrected an original card, the card carries a flag with a note on what was found and which decision is needed. **16 of your cards are flagged.** They are listed under both To review and Flagged, with the note shown above the card.

Dealing with a flag

✓ Approve and remove the flag

The card is correct as it stands. The flag disappears and the card counts as reviewed.

Restore the original

Under ... on corrected original cards, when you prefer the original wording to our correction. The original is then approved.

Resolved

Only removes the flag. The card stays under To review.

Change the note

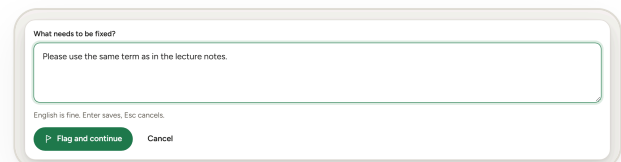

Answer us in the note with your decision or your question, in English, and we take it from there.

Remove from rotation

If the card should not be in the course at all.

Flagging a card yourself

Press , write what needs to be fixed and press Enter. You move straight on to the next card.

The screenshot shows a modal window titled 'What needs to be fixed?'. Inside, there is a text input field with a placeholder that says 'Please use the same term as in the lecture notes.' Below the input field, there is a small note: 'English is fine. Enter saves. Esc cancels.' At the bottom of the modal, there are two buttons: 'Flag and continue' (highlighted in green) and 'Cancel'.

Where the cards end up

To review Cards nobody has approved yet, flagged ones included.

Reviewed Approved cards, most recently reviewed first, with who approved them and when.

Flagged All cards with a flag, until the flag is resolved.

Removed Cards taken out of rotation. Students do not see them.

Working in English

- The translations follow the terminology of your lectures and the course literature.
- Students study the Swedish cards. **Show Swedish** on each card shows exactly what they see.
- If a translation reads oddly, flag the card and tell us. That is useful too.

A suggested way of working

- Take one topic at a time: choose it under Topic and press Start reviewing.
- Approve what is correct right away; most cards go quickly.
- When in doubt, flag rather than skip. Then we see the question.
